

EQ8: Back to the Basics
Nancy Roelfsema

All Levels

Wednesday, 8:30 - 11:30 a.m.

Room #202AB

#19500 - Quilting Technology

Are you new to EQ8? Have you owned earlier versions but just didn't use the software? Then this class is perfect for you! This class will go over the basics for beginner EQ8 users needing an overview of the EQ experience. Take an in-depth tour through the software to get a better understanding of the three worktables, the Project Sketchbook, and how to navigate the entire workspace. Learn the tools for basic quilt designing, edit blocks from the EQ Block Library to make them work for your quilt, and add borders of different widths and styles. Discover one of the many ways to expand your EQ8 software by adding more fabric, study the many pattern-printing options available, and learn how to find yardage estimates. The best way to learn is by doing! Nancy takes you through all you need to really get started while you work on your laptop.
