Metamorphosis generates transformative change in shape, nature, or structure. Animals physically develop and change from birth to maturity. Concepts and ideas morph and

change over time. Even the earth's landscape progresses through many geological and ecological stages. The pieces in this exhibition demonstrate the inevitability of physical, philosophical or personal change and the results of such transformations.

- ***International Miniature Quilt Exchange***

The QuiltShow.com sponsored a quilt exchange between quilters in the United States and international quilters. The quiltmakers were paired up to develop a friendship and to learn about each of their own quilting styles. Each team submitted two 18–24” quilts, 300 total, and 24 “mini” quilts were selected for this traveling exhibit.
