

Sacred Geometry: Dodecahedron

Reeze Hanson

Intermediate

Saturday, 8:30 - 11:30 AM

Room: Cooper Creek 2

#257509 - Piecing

What is a dodecahedron? It is a geometric shape, based on a pentagon which has been transformed into a star with ten faces! Yea right! This fabulous 3D star uses a clever template technique to rotary cut all the simple triangle pieces using templates taped to your ruler! It is a simple technique with fast and accurate results. Project makes a 24" wall hanging or it can be used in the four-part "It's Written in the Stars" Quilt Project.
