Room: Cooper Creek 1

#258503 - Quilting and Finishing

Quilting a bed-sized quilt on a home sewing machine is a challenge - but not with Ann's unique technique for joining quilted blocks or strips to make a finished quilt on your home machine. Learn the BAT Quilting technique (as opposed to learning a specific piecing technique or block pattern) while making a quilt that can be finished in class – if you do your homework and come to the workshop with pre-quilted blocks! In this workshop, you will learn all the steps needed to complete the entire quilt on your home machine. Add this critical skill to your quilting toolbox for when you want to finish the entire quilt yourself and bypass the expense of longarming. You will also learn to adapt patterns to use this technique.
