- The project will need a boat load of 2½" squares. However, what Gyleen really likes is also using her scrap box of 2½" strips that can be cut into squares as needed. Overall, I think you will need more light squares than medium/dark (m/d). How light depends on how dark your m/d squares are. You will make the final decision.

Precutting:

For precutting instructions, [click here](#). Precutting must be done before class, as there will not be class time available for cutting.
